Please take a moment to read this important information

COMFORT SOLUTIONS® LIMITED WARRANTY

The quality and craftsmanship that are built into every Comfort Solutions mattress and foundation allow Comfort Solutions to offer a limited warranty against defects in workmanship and/or materials (other than fabric, handles or tufting rosettes, if featured on this product). This warranty extends only to the original purchaser.

If service resulting from any such defect is required during the non prorated year(s) after purchase, your Comfort Solutions mattress and/or foundation will be repaired without charge for labor and materials OR at Manufacturer's option – replaced. Purchaser shall be responsible for transportation costs.

If service resulting from such defect is required during the remaining years of the applicable limited warranty, as indicated on the schedule on the opposite side, your Comfort Solutions mattress or foundation will be repaired OR replaced at the Manufacturer's option. Purchaser shall be responsible for labor and material charges, calculated as shown in the schedule for the warranty code of the model you purchased, plus all transportation costs. If identical materials are not available at the time of service, Manufacturer may substitute materials of comparable quality.

If the mattress is tufted, the tufting process (not the tufting rosettes) is covered through the limited warranty period length assigned to each mattress (see chart on back).

Proof of purchase with date, place of purchase and purchase price is required to obtain service under this warranty. Model name label and law label must be available to identify the bedding and validate this warranty. If your original Comfort Solutions dealer is no longer in business or you have moved outside the service area, please contact the Comfort Solutions Consumer Relations Office.

“SAGGING” vs. BODY IMPRESSIONS

Various components utilized for the comfort layers will settle and could compress due to the weight and shape of the user. This “settling” or compression is not a structural or design defect, but a normal, expected result. Compression of upholstery materials of 1 1/2” or less should not be considered as sagging of the mattress. Compression of upholstery layers is not covered under this limited warranty. Sagging occurs when the mattress has a depression greater than 1 1/2”. (See example above.) Two people sleeping on a queen or king mattress may notice that the head-to-foot center of the mattress is raised. This is a normal occurrence and indicates that the upholstery layers in the sleeping areas are conforming to each sleeper’s body.

Example: Measure depression by making a straight line across the top with a yard stick. Then measure the distance from the straight line to the top of the quilt surface at the lowest point of depression. In this example, the mattress has a 1 1/2” depression – it is NOT a defect covered by the warranty.
